

Keep your reputation strong and yields high ... don't misapply.

“Misapplication Prevention”

Webinar

The misapplication of fertilizer and agricultural chemicals continues to be an industry problem. As farmers have increased production, the variety, potency and complexity of chemicals has changed. Misapplication claims can be costly in both financial terms and the reputation and goodwill your business wants to to have in your community.

As a service to our customers, Continental Western Group is offering this webinar to provide information on avoiding misapplication incidents.

We will explore:

- Common mistakes
- Results of improper application
- Remedies to avoid losses
- Best practices for ensuring safe application
